

# Ba&Bes Contracting L.L.C

“Approaching your investment from a different perspective” ...

## Ba&Bes Construction Management,

Ba & Bes is a dynamic construction management company with a strong local and international heritage.

“*Local*” strength via the BA Group, one of the proud founders of the UAE.

“*International*” due to our strong Taiwanese partners BES, which has literally “*Built a Nation.*”

Ba&Bes Construction Management forms a team of qualified and experienced construction professionals from all facets of the construction industry. The synergy that comes from our collaborative expertise allows us to offer our clients efficiency in meeting project needs both from a cost standpoint as well as time management.

By offering turnkey solutions for procuring and delivering new build, fit-out and refurbishment projects, our mission is clear: We aim to bring fresh ideas to our clients whilst streamlining the construction management process adding value, cutting costs, and meeting time requirements.

Construction projects can be logistically and technologically demanding. We, as your **Construction Management Professionals**, will deploy an experienced, dedicated team who are committed to working with a bespoke, transparent, and client focused approach.

Our commitment to this management process is how we offer more than Project Management or Traditional Contracting services.

At Ba&Bes, we know that we can provide our clients an “**Optimum Delivery Strategy**” from upfront strategic advice and feasibility studies, to the successful occupation of your property.

Our specialist staff and business structure enables us to offer our clients transparency and better value for money without compromising our clients’ budget or our integrity.

“We aim to bring fresh ideas to our clients whilst streamlining the construction management process adding value, cutting costs, and meeting time requirements”
